

iCSD2025 | Old and Royal Windsor

# International Conference on Spreading Depolarisations

December 8-11, 2025

De Vere Beaumont Estate, Old Windsor

Let us know if you're interested: email [iCSDUK2025@kcl.ac.uk](mailto:iCSDUK2025@kcl.ac.uk)

Spreading depolarisations (SDs) are recognised as a strong candidate mediator of acute brain damage in patients receiving neurocritical care, whether for traumatic brain injury, ischaemic or haemorrhagic stroke, or aneurysmal subarachnoid haemorrhage.

## Topics

- Invasive and non-invasive detection
- Effects of SDs on the cerebral microcirculation
- Effects on brain metabolism
- Long term effects on cognition and connectivity
- Acute phase clinical management

**iCSD2025 is a fully translational conference**, offering around 50% clinical and 50% basic neuroscience over 3.5 days, with keynote presentations from leading investigators

Introductory educational half day on December 8<sup>th</sup> and predominantly clinical presentations on December 9<sup>th</sup>. Free paper and poster sessions throughout the meeting.

**Progress reports of clinical trials attract particular interest and are expected to be a feature of iCSD2025.**

## NEXT STEPS:

Please save the dates, and let us know you're interested at [iCSDUK2025@kcl.ac.uk](mailto:iCSDUK2025@kcl.ac.uk)

We will notify you when the website opens (June) and its address.

We look forward to seeing you at Old Windsor!
